

Daniel Hu

📍 Cambridge, MA ✉ danielhu@math.harvard.edu

Research Interests

Arithmetic geometry, automorphic representation theory, and p -adic Hodge theory.

Education

Harvard University

Ph.D. in Mathematics (in progress)

- Advisor: Mark Kisin.

Cambridge, MA

Sep 2023 - Present

Princeton University

Bachelor of Arts in Mathematics

- Highest honors, GPA: 4.0/4.0. Senior thesis advisor: Shou-Wu Zhang.

Princeton, NJ

Sep 2019 - May 2023

Publications

- [3] *Modular forms and an explicit Chebotarev variant of the Brun–Titchmarsh theorem* (with H. R. Iyer and A. Shashkov). Research in Number Theory 9 (2023) no. 46.
- [2] *On a Mertens-type conjecture for number fields* (with I. Kaneko, S. Martin, and C. Schildkraut). Mathematical Proceedings of the Cambridge Philosophical Society, to appear.
- [1] *Order of zeros of Dedekind zeta functions* (with I. Kaneko, S. Martin, and C. Schildkraut). Proceedings of the American Mathematical Society 150 (2022), 5111-5120.

Awards

Middleton Miller '29 Prize.	<i>May 2023</i>
Election to the Sigma Xi chapter at Princeton University.	<i>May 2023</i>
Early Election to the Phi Beta Kappa chapter at Princeton University.	<i>Sep 2022</i>
Andrew H. Brown Prize.	<i>May 2022</i>
Barry M. Goldwater Scholarship.	<i>Mar 2022</i>
Shapiro Prize for Academic Excellence.	<i>Sep 2021</i>
Shapiro Prize for Academic Excellence.	<i>Sep 2020</i>
